

The easiest way to sign.

100% safe and legally valid.

Sign documents online.

Edit, send, sign and custody documents online.

MyRubric, allows fast management, comfortable and 100% secure documents.

This system is cheaper, healthier and greener than the traditional paper signature.

Healthy Signature

The non-face-to-face signature prevents the transmission of viruses and bacteria.

Signing at a distance allows you to limit contact between people, thus avoiding the transmission of viruses and bacteria both through direct contact between people and through the media used (envelopes, contracts, ...).

That easy.

1 | Edit

With MyRubric, insert the signature fields in the document easily and intuitively.

2 | Send

Send the document to be signed by one or more recipients.

3 | Sign

Sign any document quickly and comfortably, in mobility and in real time, from a mobile or tablet and with total security.

4 | Custody

The document is saved with valid last generation certificates on the cloud.

What value does MyRubric bring?

Fast and Easy

Documents signed in less than 2 minutes. Preparation, shipping, record high.

Signature in real time mobility. It facilitates the fast and comfortable signature on your device (mobile, tablet or computer).

Save money

Eliminates transportation costs, travel and custody of your employees, customers and suppliers.

Save time by removing paper and ink. It also removes document storage space.

Healthy Signature

The non-face-to-face signature prevents the transmission of viruses and bacteria.

Signing at a distance allows you to limit contact between people, thus avoiding the transmission of viruses and bacteria both through direct contact between people and through the media used (envelopes, contracts, ...).

It increases your ratios

Thanks to this system, you can safely sign documents remotely, which will allow you to increase your conversion rates at closing deals, contracts, etc.

No initial investment

You only pay for the signed documents.

Service launch in less than 5 minutes, 100% online process.

Ecological signature

Reducing carbon footprint. Stop generating 15 grams of CO₂eq. for each DIN A4 sheet printed.

100% Secure

MyRubric signs the documents with valid state-of-the-art certificates, which cannot be modified and comply with current regulations.

GDPR Compliance

To avoid economic sanctions and guarantee the trust of our customers, we guarantee that our platform strictly complies with the new General Data Protection Regulation.

Electronic Evidences

The firm collects biometric data from the signers, such as the direction, speed and pressure of the signature.

It also collects the moment, the location and device from which it is signed.

MyRubric is as or more secure than the signature on paper.

New features

Using the app 100% from mobile

From today the use of the **MyRubric** application can be used **100% from the mobile**, including all the available functionalities.

Templates

We incorporate the use of **templates**, which are documented

Documents that are used when you have to send the same document on a recurring basis and the only changes between documents are specific fields for each signer (name, surname, ID, address, email, company, custom fields, ... etc). **This is a way to save time when the same document is sent many times.**

Shipments of documents from the phone

The two previous functionalities allow you to send **documents** on the go from your smartphone.

Documents: valid for documents available on your mobile device.

Documents from templates: The template can be created and sent at the same time, but the most common will be to have it configured beforehand in the office / home. Especially suitable for transactions where the person who generates the contract is on the move (example: real estate, auto-schools, ... etc) and the person who signs is in the same place or in another.

Custom fields

Custom fields can be used to complete a **document** or **template** with additional information that is requested at the time the **document** is submitted using a form. These **custom fields** allow great flexibility when sending **documents**, especially when they are done together with the **templates**. For example, in the case of a real estate exclusive contract, based on a template, these **custom fields** would be used to inform the address of the property, characteristics of the property, the amount of the contract, ... etc.

Choose your pack and forget about it.

Buy MyRubric when, where and how you want.

Choose your plan. Buy it anywhere.

No quotas, no commitments without permanence.
